product range

SKR line

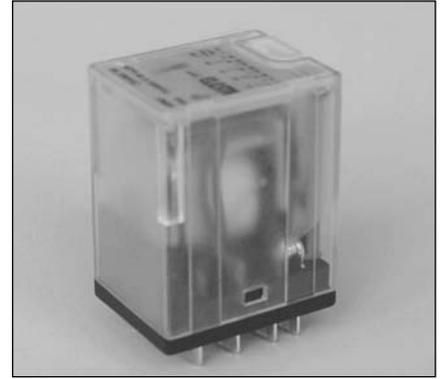

- industry relay
- standard 10 A
- plug-in relay 2-pole
- plug-in relay 3-pole

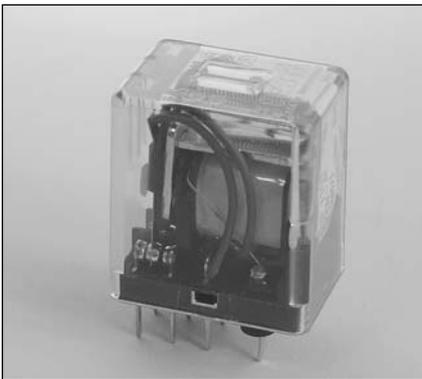

- PCB version
- double contact

SFR line

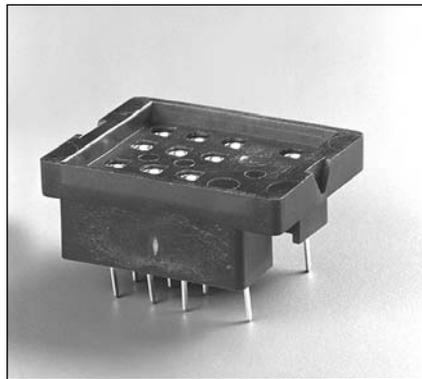

- industry relay
- standard 5 A
- plug-in relay 4-pole

FR line

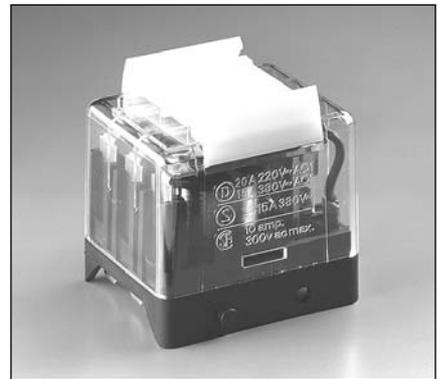

- miniature relay 4 A
- PCB version

FR line socket

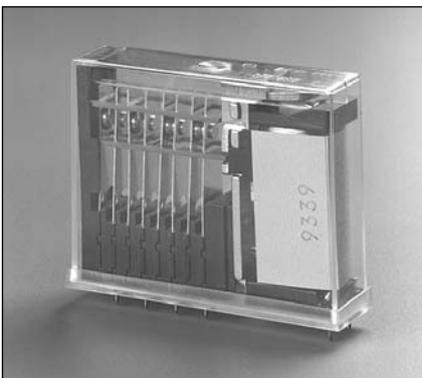

- matching FR line

LR line

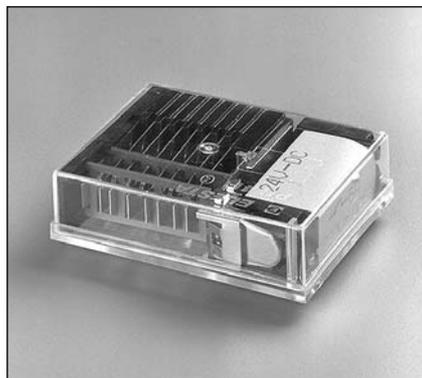

- power relay

PR line

- PCB relay 6 A
- forcibly actuated

MR line

- universal relay
- soldering version
- plug-in version 8-pole
- plug-in version 11-pole
- high impedance, sensitive coil

SKR - industry relay

the universal relay SKR

The strengths of the SKR industry relay lie in the mature and thought-out construction.

Over-average contact safety and life time, electrical and mechanical status indication as well as the unsurpassed construction from only six assemblies makes the relay to the excellent power switch.

the time module STM

8 adjustable functions and 8 selectable time ranges: these are the special features of the time module STM. With only one version of the module all essential features as operating voltage, functions and time ranges are adjustable.

The result: a simple and cost-effective warehousing.

the socket

Simple to handle screw-terminal and clear, rich in contrast labeled clamp identification, are the base for a problemless use.

The ZKE/ZKX sockets permit a rapid and secure installation.

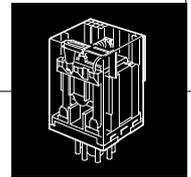

The separated inputs and outputs are located at one level. There is also the possibility to plug a time module STM or other additional modules together with the SKR relay.

features

- simple construction
- high contact load
- contact spring in Beryllium bronze
- safe wire diameter
- long life time
- large coil room
- electrical or mechanical status indication
- integrated manual actuation
- simple installation
- indelible scheme on socket or cover following international standards

applications

- mostly used where a time-dependent event must be headed
- switch panel making
- machine industry
- illuminations
- locking of functions
- gate control
- machine control

SKR085 - industry relay, 8-pole

Industry relay with two change-over contacts in different versions.

order numbers

serial version	SKR 085 A ...
	VDC/AC
with mechanical position indication	

contact specifications

contact material	AgCuNi
contact type	single contact
nominal switching capacity	250 VAC 10 A AC1 2500 VA 440 VAC 4 A AC1
electric life expectancy	app. 700'000 operations 250 VAC, 10 A, AC1 (360 operations/h)
inrush current max.	40 A for 200 ms
switching current range	50 mA to 10 A
switching power range	0,3 VA(W) to 2500 VA

options

electrical	
position indication	SKR 085 L ..
with free wheel diode	SKR 085 F ..
electrical	
position indication	
with free wheel diode	SKR 085 FL ..
double contact	SKR 085 D ..
without manual	
actuation	SKR 085 B ..
push-button actuation	SKR 085 T ..
current coil	SKR 085 C ..

(combinations with mechanical and electrical position indication and free-wheel diode are possible)

general data

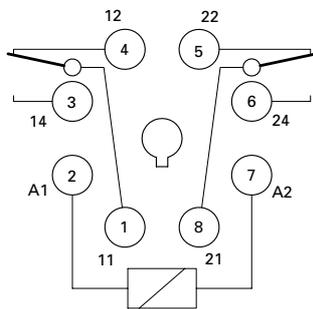

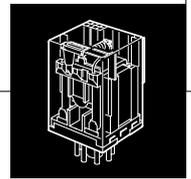

mechanic life expectancy	> 10 ⁸ operations
mechanical switching frequency	20 Hz
pull-in time	12 ms at DC / 3-10 ms at AC
release time	3,5 ms at DC / 2-15 ms at AC
bounce time normally open contact	3,5 ms at DC / 3-6 ms at AC
bounce time break contact	9 ms at DC / 6-11 ms at AC
shock resistance	AK: > 10 g
vibration resistance	10-55 Hz, AK: 10 g, RK: 3 g
test voltage, coil/contact	2500 V _{eff}
test voltage, open contact	1500 V _{eff}
insulation resistance	10 ¹² Ohm
weight	app. 80 g
installation situation	any
ambient temperature	max. +70 °C
protection standard	IP 40

accessories

plug-in socket	ZVE 8
	ZKE 088
metal clamp	ZKR 008

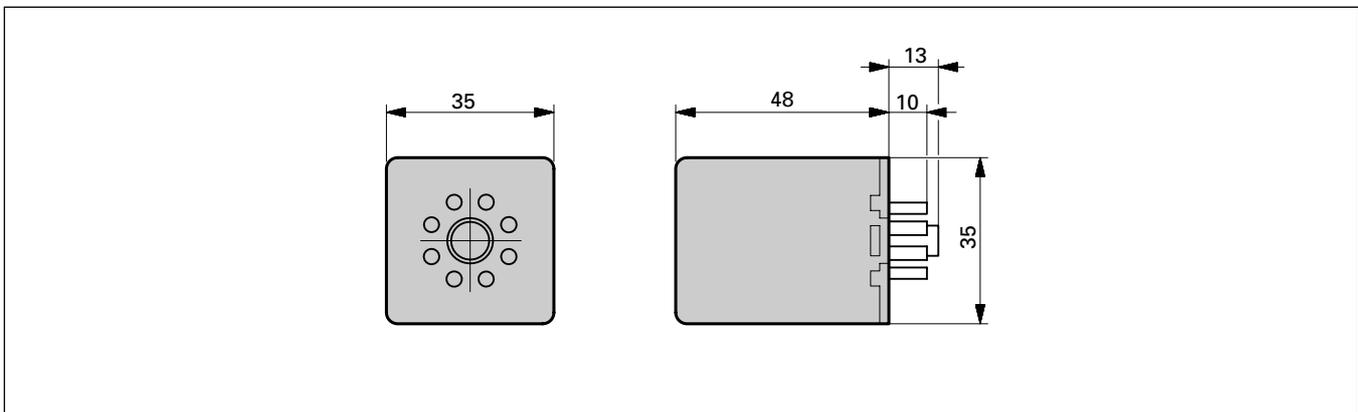

tests, instructions

certificates	UL, CSA, VDE
insulation group	VDE 0110 / group C 250 VAC

SFR - industry relay

the SFR-industry relay

SFR industry relays are the ideal relays for control systems.

A simple construction guarantees the safety of these relays. The large contact rivet (\varnothing 3 mm) guarantees the extraordinary life time.

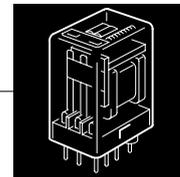

An ideal product for control systems in combination with the socket program and the accessories.

features

- large contacts (\varnothing 3 mm)
- extraordinary life time
- mechanical lever integrated in the cover
- large separating walls between the contacts guarantees high creeping and leakage distance
- mechanical position indication
- complete accessory
- all relays are 100% computer tested

applications

- switch panel making
- machine and plant industry
- switching between functions

type number key

SFR 143 A 024VDC

coil voltages

024 VAC 024 VDC
 115 VAC 110 VDC

LR-power relay

the power relay LR

LR relays are power relays which convince by her brilliant simplicity. The mature and simple construction will predestine this relay for the rough and uncompromising use.

By using best materials and because of the simple construction a max. mechanical and electrical life time was achieved.

The special advantages of this mature relay lie in the high switching power as well as in the low power consumption of the coil.

The LR relay is available in AC- and also in DC- version

features

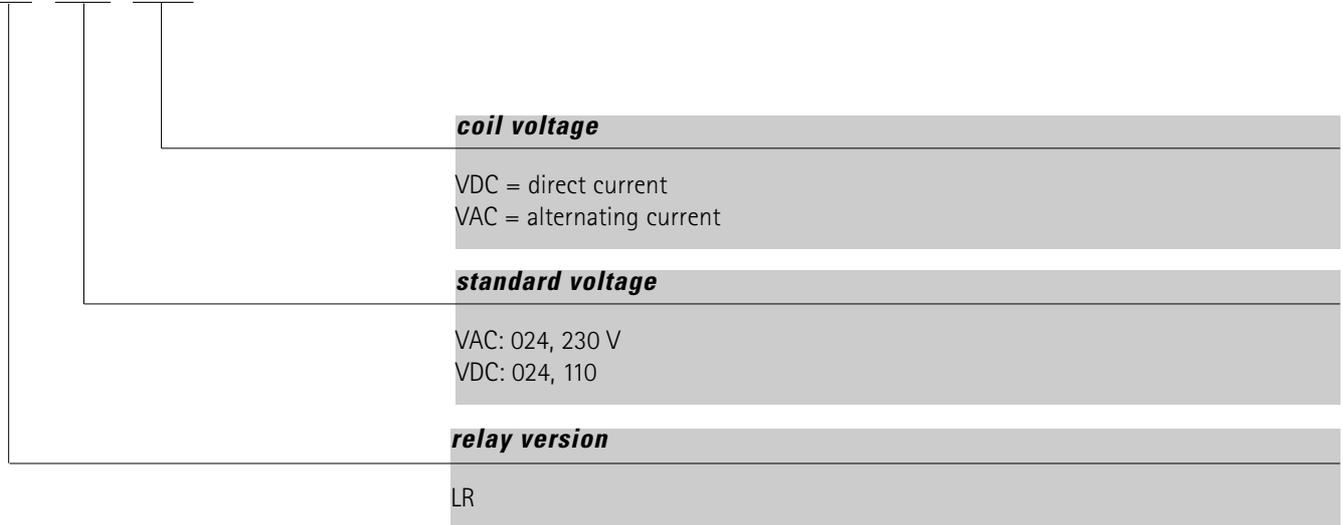

- simple construction
- high switching power
- low coil power
- extraordinary life time
- DIN rail mountable

applications

- switching of short-circuit runner engines
- radiators in household appliance
- radiators in electromechanical ovens

type number key

PR - PCB relay

the PR-PCB relay

PCB-Relay from the PR family are small relays. The version has forced guided contacts, 2 normally open contacts, 2 normally closed contacts.

In the industrial electronic as well as in the control industry they are used as fail-save elements.

The forced guided contact version are often used in control systems of high safe applications.

By using best materials and because of the simple construction the highest fail-security was achieved.

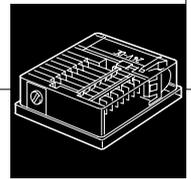

High precision in mechanical and electrical control guarantees the high and stable quality of the relays.

features

- simple fail-save construction
- high switching power
- high load current
- extraordinary life time
- high contact force
- security distance according to VDE and CSA
- minimal dimensions
- the forced guided contact version, SUVA approved.

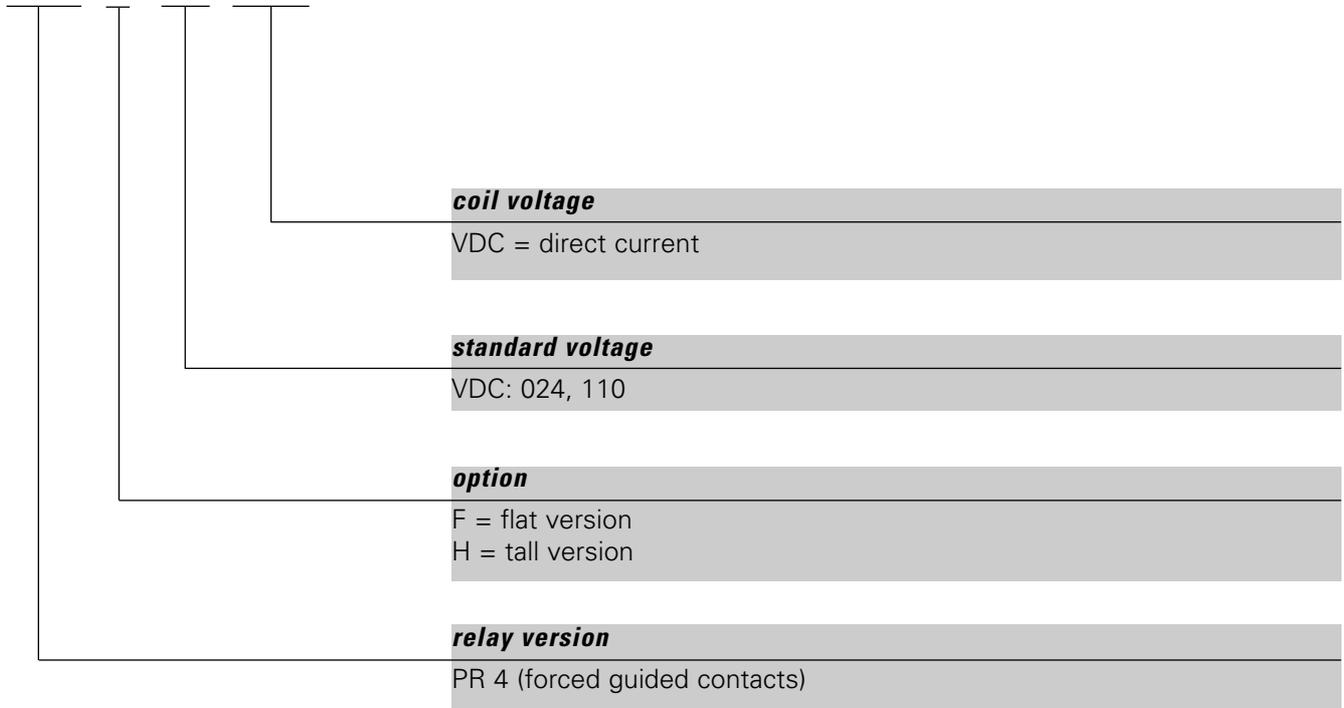

applications

- devices of automation and control

MR - special relay

the special relay MR

MR relays are fail-safe and universal useable elements with excellent contact load and high pull-in sensitivity.

The big bobbin and the variability of the contacts make a lot of versions for different applications possible.

features

- different versions enable the ideal adaption for different applications.
- short contact springs enable bounce-free switching.
- special synthetic-layers and a substantial over-travel are the reasons for the constancy and safety at a large number of operations, also in bad climate conditions.

applications

- industrial electronics
- automation and control

Special relays with different contact versions for several applications.

contact material AgCuNi
contact versions up to 6 pairs optionally

general data

mechanic life expectancy	> 50 x 10 ⁶ operations
mechanical switching frequency	10 Hz
pull-in time	10-30 ms
release time	6-8 ms
test voltage, coil/contact	2'000 V _{eff}
test voltage, open contact	2'000 V _{eff}
weight	dependence of the version
installation situation	dependence of the version
ambient temperature	max. +60 °C

accessories

socket 8-pole ZKR 088
socket 14-pole ZB 35
metal clamp MR8 ZFR 002
metal clamp MR14 ZFR 003

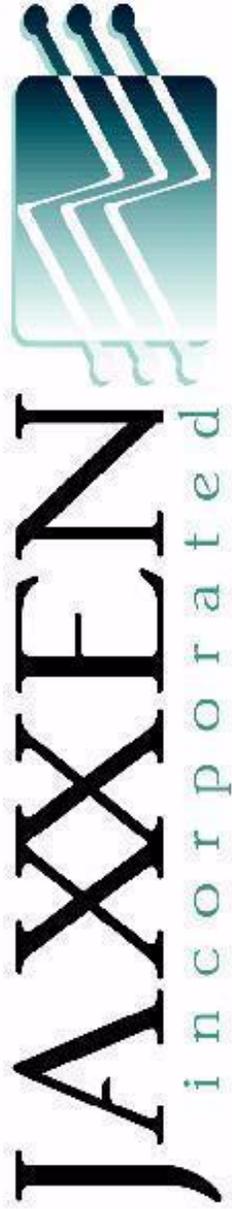

coil specifications

standard coils for direct current:	3 - 300 VDC
standard coils for alternated current:	3 - 240 VAC
